Dear [REDACTED]

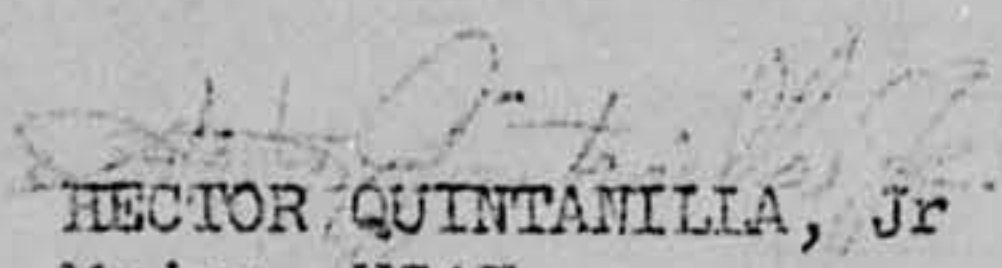

The description of the objects which you observed on the night of 26 July 1965 are similar to meteors. However, the duration of twenty minutes is not consistent with this evaluation. The duration is very confusing since you indicate that the object was traveling at 2000 mph. Also, an object at the distance which you indicated would show no detail. The direction of one object, speed and altitude reported indicates a possible satellite observation, but the description of the object is not in accord with this evaluation. No time motion sequence was given for the two objects. The most likely explanation in view of the conflicting data presented, is a jet aircraft with afterburner. Your description of the object, like a burning match, and the flight is consistent with this analysis, however, a duration of 20 minutes is too long for an aircraft to be observed. The case has been evaluated as conflicting data, in view of the description, duration, speed and elevation or altitude of the object.

The attached brochure gives the results of our project since its inception. Project Blue Book is an unclassified project.

The Air Force does not engage in any activities such as you have indicated in your letter of 8 September 1965. Nor do we request the FBI or local officials to do so.

The Air Force regards all witnesses as reliable and sincere and does not question the integrity of those reporting sightings. Your report was forwarded to us from Los Angeles and the additional form was sent to you because no evaluation could be made on the original data which we received. This is the only contact which we have had with you and your report has received the evaluation given in our previous paragraph. No further investigation into this matter will be made.

Sincerely,

HECTOR QUINTANILLA, Jr.

9/8/65

To Major Hector Quintanilla, Jr.
Chief - Project Blue Book, U.S.A.F.

I know this might sound strange but it is just how I feel, that someone is always following me around wherever I go.

Whenever I turn around on the street I see someone looking at me and not just glancing either because at one time approx. 9:10 on the ~~20~~ 7th of September 1965, a man followed me for four long blocks until I stopped at a news-stand too glance at the head-lines.

He then by-passed me and went into a coffee-shop and sat down
(over)

I think maybe he did.

Then I kept on walking until I was three blocks away, ~~that~~ then I took a side street and came of on the original street before.

But after I walked away from the news-stand, across the street two men were watching me from a parked car until I took the side street.

Please Major Sir,

If someone is following me and seeing if I'm a lie about what I saw on the 26th of July, 1965 and is investigating me I want to be left alone, but if you don't have and certain group following me like the F.B.I. or someone else I'm sorry for taking up your time on this matter.
